

JAGA penny with Millmax connector

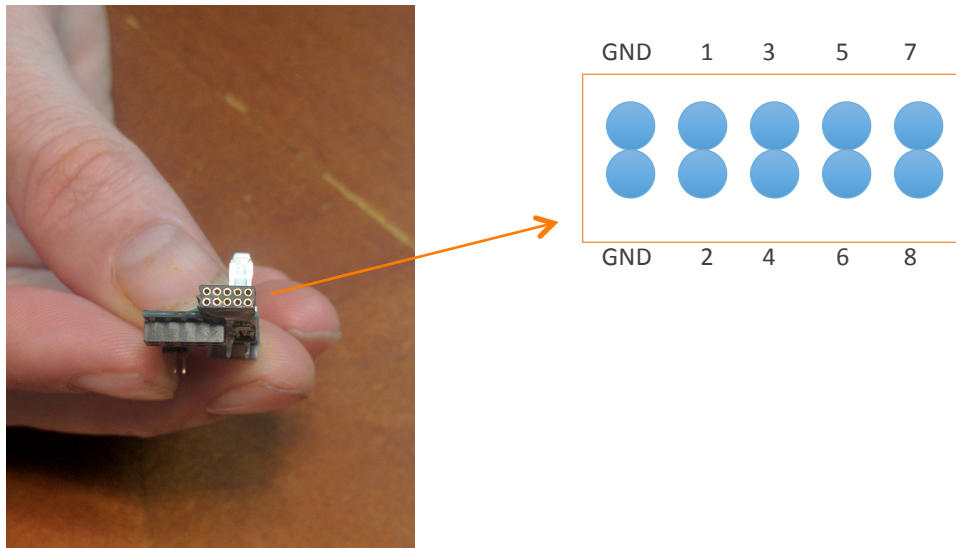

v.1b Oct, 2016

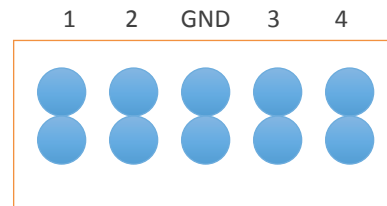

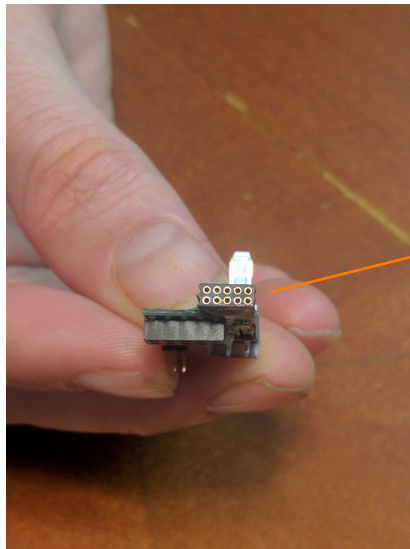

Our JAGA penny Millmax connector either comes with the 8 channel EEG recording or 4 channel EEG or 4 channel Neuronexus Qtrode compatible recording.

Note: One row of the connector is possible instead of double rows for 4 channels.

1. For 8 channel EEG recording with screw electrodes

2. For 4channel EEG recording screw electrodes or Neuronexus Qtrode with screw electrodes

Bottom row not connected
